Alan Matias

UX designer and engineer. 3+ years of experience.

Portfolio at AlanMatias.com.

Experience

Qualtrics

UX Designer. June 2025 - present

- As part of the core Survey Building team, I redesigned our Guidance & Errors feature, increasing usage from 10% → 40% MAU (250,000 users).
- Created an analytics report with Amplitude to create the problem statement, collaborated with user research to test, and implemented designs in Cursor.
- Co-designed a new design system pattern, already launched in 2 products.
- Coached 6 designers to code with Cursor 1:1, resulting in all merging real code.

Ab Initio

UX Designer. September 2023 - May 2025

- **Decision Flows.** Sole designer on a team of ~20 eng with no PM or research. I led the roadmap, design, research, and implementation of our MVP in 1 year launch.
- **Unified Data Platform.** As the sole designer, I collaborated with a PM to take a 5-year design vision and lead the 6-month MVP. I led weekly scope discussions, championed UX in an eng-heavy environment, and shipped on time for our client.
- **Design System.** I built our first design token system in code, turning ~400 variables into ~50 tokens tied to consistency, theming, and accessibility.

Zillow

UX Design intern. Design Systems. Summer 2023

- Redesigned Zillow's Filter page for iOS and Android to follow native best practices.

Docusign

UX Design intern. Summer 2022

- Designed a contract timeline overview with a PM and design systems.

Education

M.S. Computer Science, HCI focus

Georgia Institute of Technology
